Alain Connes
Advances in Mathematics

Hi,

Please consider this manuscript for publication. I am not sure that this manuscript will really meet the exacting standards of your journal, as it is not particularly deep, wide or informed. However, it is sufficiently cross-disciplinary (applying methods from operator theory, measure theory, probability theory, dynamical systems and Banach spaces to a classical topic from number theory) that I am not sure where else it could be submitted for publication. I am an inexperienced author, so pardon my confusion on this matter.

Sincerely,

Linas Vepstas
